Insight Engine

POWERED BY GPS INSIGHT · SERVICEBRIDGE

The Insight Engine | Franchise Network ROI Model

Data Definition & Source Reference Matrix

Defines every input, assumption, and output in the model — with source citations and confidence ratings · April 2026

Purpose: This document defines every data point in the The Insight Engine, explains how each figure is calculated, and cites the research source behind each assumption. Confidence ratings (Very High / High / Med-High / Medium) reflect the quality and breadth of supporting evidence. Users may substitute their own inputs — all model cells are unlocked for this purpose.

SECTION 1 — Franchise Profile Inputs (Blue cells in the ROI Model — user-editable)

Data Field	Definition	How Calculated	Source / Reference	Confidence
Franchise / Brand Name	Name of the franchisor or brand being modeled	User input — enter the target franchise name	User input — no calculation required	N/A
Trade / Industry	The primary service vertical (e.g., HVAC, Pest Control, Restoration)	User selects from Trade Benchmark Reference tab	Trade Benchmark Reference tab; BLS Occupational Employment Statistics 2024	**High**
Technicians in Network	Total number of field technicians across all franchise locations	User input — sum of all active field techs in the system	Franchise disclosure documents (FDDs); operator self-report; IFA Franchise Economic Outlook 2024	**High**
Fleet Vehicles	Total number of service vehicles in the network	User input — typically 1:1 ratio with technicians for home services	Industry standard: HVAC, plumbing, pest control average 1.0–1.1 vehicles per tech (BLS 2024)	**High**
Avg Technician Wage ($/hr)	Base hourly wage — not loaded cost. The raw hourly pay rate before benefits and burden	User input — reference Trade Benchmark tab for typical ranges by trade	BLS Occupational Employment and Wage Statistics 2024; Insight Engine Trade Benchmark Reference; HomeAdvisor Pro Compensation Survey	**Very High**

			2023	
Employer Burden % (bene+taxes)	Total employer-side costs above base wage: FICA, unemployment, workers comp, health, and other benefits	Loaded cost = Base wage × (1 + burden %). Typical range: 40–60%	U.S. Bureau of Labor Statistics Employer Costs for Employee Compensation (ECEC) 2024; industry standard 52% used as default	**Very High**
Average Job Ticket ($)	Average revenue collected per completed service job	User input — total annual revenue ÷ total jobs completed annually	Trade Benchmark Reference tab; HomeAdvisor True Cost Guide 2024; Angi Pro Benchmarks 2023	**High**
Jobs Per Technician Per Day	Average number of jobs one technician completes in a standard workday	User input — varies by trade. Pest control: 8/day. Plumbing: 4–5/day. Restoration: 2/day	Trade Benchmark Reference tab; Field service industry benchmarks (ServiceMax FSM Benchmark Report 2023)	**High**
Working Days Per Year	Number of productive field days per technician annually	Standard = 52 weeks × 5 days = 260 days. Accounts for holidays and PTO separately	Standard U.S. work calendar; IFA workforce benchmarks 2024	**Very High**
Current FSM Status	The franchise network's existing field service management maturity level	User selects: Paper / None | Basic Tool | Mid-Tier FSM | Enterprise FSM. Affects recovery % assumptions	GPS Insight / ServiceBridge sales qualification framework; IFA Technology Adoption Survey 2023	**Medium**
Payment Collection Method	How the network currently collects payment from customers	User selects: Invoice/Mail | Mixed | Field Collection. Affects DSO and cash flow recovery calculations	GPS Insight internal data; Fiserv payment industry benchmarks; NACHA ACH payment statistics 2023	**High**
Fleet Insurance ($/vehicle/yr)	Current annual commercial auto insurance premium per vehicle	User input — typically $2,500–$5,000 per vehicle for home services fleets	Insureon Commercial Auto Insurance Cost Report 2024; Progressive Commercial Fleet Benchmarks 2023; GPS Insight customer data	**High**

SECTION 2 — Derived Assumptions (Auto-calculated from Section 1 — do not edit)

Data Field	Definition	How Calculated	Source / Reference	Confidence
Loaded Cost ($/hr)	True employer cost per technician hour including all burden — used as the basis for all time-value calculations	Loaded cost = Base wage × (1 + burden %). Default: $28 × 1.52 = $42.56/hr	U.S. Bureau of Labor Statistics ECEC 2024; standard employer cost accounting methodology	**Very High**
Annual Labor Cost / Tech	Total employer cost for one technician for a full year	Annual labor = Loaded cost × 8 hrs/day × working days/year. Default: $42.56 × 8 × 260 = $88,525	Derived from BLS ECEC methodology; standard cost accounting	**Very High**

Admin Time Cost / Tech (30%)	Dollar value of the time each technician currently spends on non-billable administrative tasks	30% of annual labor cost. Industry research shows field techs spend 28–35% of day on paperwork, dispatch calls, and data entry	Salesforce Field Service Report 2024: 30% non-billable; Aberdeen Group Field Service Research 2023; ServiceMax Benchmark Report 2023	**Very High**
Annual Revenue / Tech	Total revenue generated by one technician per year at current productivity	Annual revenue = Avg ticket × jobs/day × working days/year. Default: $800 × 2 × 260 = $416,000	Derived from user inputs — ticket size and jobs/day validated against trade benchmarks	**High**
Platform Cost / Tech / Year	Total annual ServiceBridge subscription cost per technician	Platform cost = $24.95/user/month × 12 months = $299.40/tech/year	ServiceBridge official pricing — $24.95 per user per month (USD). gpsinsight.com/brand/servicebridge	**Exact**

SECTION 3 — Value Levers (Toggle Yes/No in Col B, adjust recovery % in Col C)

Data Field	Definition	How Calculated	Source / Reference	Confidence
1. Admin Time Recovery	Value recovered by converting non-billable admin hours into productive field time through digital dispatch, mobile work orders, and automated scheduling	Recovery = Admin time cost × recovery %. Default 50% recovery of 30% non-billable time. Per tech/yr: $26,557 × 50% = $13,279	Salesforce Field Service Report 2024: 30% non-billable baseline; Aberdeen Group 2023: FSM adoption recovers 40–60% of admin time; ServiceBridge customer outcomes (Critter Control, Robertson Pools)	**Very High**
2. Invoice Leakage + Ticket Size	Revenue recovered through digital close-out prompts (upsell reminders, parts capture, time-and-materials tracking) and elimination of underbilling	Recovery = Annual revenue × recovery %. Default 15% ticket increase. Per tech/yr: $416,000 × 15% = $62,400	ServiceMax FSM Benchmark 2023: 10–20% avg ticket increase with digital close-out; Intuit QuickBooks FSM Study 2023; GPS Insight / ServiceBridge customer data (Robertson Pools: 64% revenue growth)	**Very High**
3. Route Optimization	Fuel savings and additional jobs completed per day through AI-optimized routing and real-time traffic-aware dispatch	Recovery = (extra jobs × ticket) + (fuel savings × working days). Default 25% of ticket per tech/day in recovered capacity	GPS Insight telematics data: 12–18% fuel reduction; Samsara Fleet Intelligence Report 2024: 1 additional job/day with optimized routing; U.S. DOE fuel cost benchmarks	**High**
4. DSO Reduction — Cash Flow	Cash flow improvement from reducing Days Sales Outstanding — collecting payment in the field at job completion vs. mailing invoices	Recovery = Annual revenue × recovery % modeled as working capital freed. Default 2% of annual revenue. Per tech/yr: $416,000 × 2% = $8,320	NACHA ACH statistics 2023: field payment collection reduces DSO from 32 days to same-day; Fiserv payment industry data; GPS Insight / CardConnect integration benchmarks	**High**

5. First-Time Fix Rate	Cost reduction from fewer repeat site visits (callbacks) by ensuring technicians arrive with full customer history, equipment records, and correct parts	Recovery = (callback reduction × loaded tech cost per visit). Default 20% improvement. Per tech/yr: ~$1,328	Aberdeen Group Field Service 2023: FSM improves first-time fix rate by 20–25%; ServiceMax 2023: avg callback costs 2 hrs loaded labor; GPS Insight equipment history features	**Med-High**
6. Fuel Card + Ghost Time	Accountability savings from GPS cross-referencing fuel card transactions against vehicle location — eliminates off-route fueling and personal purchases billed to company	Recovery = $1,800/vehicle/year. GPS Insight benchmark: average $150/vehicle/month recovered through cross-referencing	GPS Insight internal telematics data — fleet fuel card cross-reference analysis; American Trucking Association fuel cost benchmarks 2024	**Medium**
7. Insurance Premium Reduction	Commercial auto insurance premium reduction from sharing GPS telematics safety data (hard braking, speeding, idle time) with commercial carriers	Recovery = Fleet insurance cost × reduction %. Default 20% premium reduction. Per tech: ($3,264 × 20%) = $653	Progressive Commercial: telematics programs reduce premiums 15–30%; Insureon 2024; GPS Insight carrier program data; Nationwide Fleet Telematics Study 2023	**High**
8. Surcharge Passthrough (Fiserv)	Revenue recovered by passing payment processing surcharge to customers via Fiserv / CardConnect integration — eliminates merchant fee absorption	Recovery = Annual revenue × 3% card volume × surcharge passthrough rate. Per tech/yr: ~$10,400 (at 3% card volume, 100% passthrough)	Fiserv / CardConnect merchant surcharge program; GPS Insight / ServiceBridge payment integration documentation; Nilson Report 2023: avg 3% card processing cost	**High**

SECTION 4 — ROI Summary Outputs (Calculated — read-only)

Data Field	Definition	How Calculated	Source / Reference	Confidence
Value Recovered / Tech / Year	Total annual dollar value recovered per technician across all selected levers	Sum of all active lever outputs ÷ technician count. Conservative default: $15,000–$35,000 depending on trade and recovery %	Aggregate of lever calculations — each sourced independently above. Validated against ServiceBridge customer case studies	**High**
Total Network Value Recovered	Total annual value recovered across all technicians in the franchise network	Value/tech × total technicians in network	Derived calculation — scales linearly with network size	**High**
Total Platform Cost / Year	Total annual ServiceBridge subscription cost for the entire network	$24.95 × 12 months × total technicians = $299.40/tech/year × network size	ServiceBridge official pricing. List price as of April 2026: $24.95/user/month USD	**Exact**
Network ROI Multiple	Total value recovered as a multiple of total platform cost — the headline ROI figure	Network ROI = Total value recovered ÷ total platform cost	Calculated ratio — no external reference required. Conservative inputs produce 25–58x; model default (BELFOR) shows 501x	**High**

			due to network scale	
Payback — Working Days	Number of working days until cumulative value recovered exceeds total annual platform cost	Platform cost ÷ (daily value recovered). Daily value = Annual value recovered ÷ 260 working days	Derived calculation. At $299.40/tech/year cost and $13,279+/tech/year minimum recovery, payback occurs in < 6 working days for all trades modeled	**Very High**

SECTION 5 — PE / Board Exit Math (Enter exit multiple range — all else calculated)

Data Field	Definition	How Calculated	Source / Reference	Confidence
Network EBITDA Improvement	Annual documented EBITDA improvement attributable to ServiceBridge across the franchise network. Equivalent to total network value recovered — each recovered dollar flows directly to franchise EBITDA	EBITDA improvement = Total network value recovered (Section 4). Assumes recovered value flows to franchisee profit — valid for operational cost reductions and revenue improvements	Standard PE portfolio EBITDA attribution methodology; Bain & Company Private Equity Report 2024; home services M&A precedents (IBBA, GF Data)	**High**
Exit Multiple — Low / High	The EBITDA multiple at which the PE firm expects to exit the investment. Drives enterprise value calculation	User input — enter the target exit range. Home services industry standard: 8–12x for established franchise networks; 10–14x for tech-enabled or high-growth networks	GF Data M&A Report 2024: home services franchise exits averaging 10.2x EBITDA; PitchBook Private Equity Comps 2024; Franchise Times Top 400 transaction analysis	**High**
Enterprise Value Created at Exit	Incremental enterprise value generated at exit from the EBITDA improvement ServiceBridge produces — the dollar value the PE firm realizes from the platform investment	Enterprise value = EBITDA improvement × exit multiple (low and high). Example: $11M EBITDA improvement × 10–12x = $110–132M enterprise value created	Standard PE enterprise value calculation methodology; home services M&A comparable transactions (GF Data, PitchBook 2024)	**High**
Exit Value ROI on Platform	Enterprise value created at exit as a multiple of the total annual platform cost — the PE firm's return on the ServiceBridge investment specifically	Exit ROI = Enterprise value created ÷ annual platform cost. Example: $110M ÷ $1.5M/yr = 73x return on platform spend	Derived calculation. Validated against PE portfolio technology investment benchmarks (McKinsey Digital 2024: operational technology investments average 3–8x returns; ServiceBridge significantly exceeds this due to EBITDA multiplier effect)	**High**
Platform Cost as % of EBITDA	Annual platform cost expressed as a percentage of the EBITDA improvement it	Platform % = Annual platform cost ÷ annual EBITDA improvement × 100.	Derived calculation. Confirms investment is immaterial relative to value created —	**Exact**

	generates — demonstrates how small the investment is relative to the value it creates	Default model: $2.77M ÷ $1.39B = 0.2%	standard PE capital allocation filter	

TRADE BENCHMARK REFERENCE (Source data for Section 1 inputs by trade)

Trade	Wage/hr	Loaded/hr	Ticket ($)	Jobs/Day	Admin Hrs	Primary Source
Master Plumber	**$38**	$57	$315	5.0	2.4 hrs	*BLS OES 47-2152; HomeAdvisor 2024*
HVAC Technician	**$37**	$55	$280	5.0	2.4 hrs	*BLS OES 49-9021; Angi Pro 2024*
Electrician	**$35**	$53	$260	5.0	2.4 hrs	*BLS OES 47-2111; HomeAdvisor 2024*
Pest Control Tech	**$20**	$30	$85	8.0	2.0 hrs	*BLS OES 37-2021; NPMA Benchmarks 2024*
Handyman	**$25**	$38	$150	7.0	2.0 hrs	*BLS OES 49-9071; Angi True Cost 2024*
House Cleaner	**$16**	$24	$120	4.0	1.5 hrs	*BLS OES 37-2011; ARCSI Survey 2023*
Landscaping Tech	**$18**	$27	$180	4.0	1.5 hrs	*BLS OES 37-3011; NALP Industry Survey 2024*
Pool Tech	**$22**	$33	$120	6.0	2.0 hrs	*BLS OES 37-3091; APSP Benchmarks 2023*
Restoration Tech	**$28**	$42	$800	2.0	2.5 hrs	*BLS OES 47-4041; RIA Restoration Industry Survey 2023*
Appliance Repair	**$24**	$36	$180	6.0	2.0 hrs	*BLS OES 49-9031; ASTI Survey 2024*
Glass Installation	**$26**	$39	$250	4.0	2.0 hrs	*BLS OES 47-2121; AGCA Industry Data 2024*
Gutter Services	**$20**	$30	$200	5.0	1.5 hrs	*BLS OES 47-4099; HomeAdvisor True Cost 2024*
Septic Maintenance	**$22**	$33	$300	3.0	2.0 hrs	*BLS OES 47-4071; NAWT Industry Survey 2023*

All wage data: Bureau of Labor Statistics OES May 2024 release. Ticket and jobs/day data: trade association surveys and HomeAdvisor/Angi True Cost Guide 2024. Admin hours: ServiceMax FSM Benchmark Report 2023.

MASTER SOURCE LIST (Complete bibliography for all model assumptions)

#	Source	What It Supports in the Model
1	BLS Occupational Employment and Wage Statistics (OES) 2024	Base wage by trade — all 13 trades; employer burden calculation
2	BLS Employer Costs for Employee Compensation (ECEC) 2024	52% employer burden default; loaded cost methodology
3	Salesforce Field Service Report 2024	30% non-billable time baseline; admin time recovery lever
4	Aberdeen Group Field Service Research 2023	40–60% admin time recovery with FSM; first-time fix rate improvement (20–25%)
5	ServiceMax FSM Benchmark Report 2023	Jobs/day by trade; 10–20% ticket increase with digital close-out; callback cost (2 hrs loaded labor)
6	HomeAdvisor / Angi True Cost Guide 2024	Average job ticket by trade — plumbing, HVAC, handyman, landscaping
7	NPMA Pest Management Industry Survey 2024	Pest control tech wage, jobs/day, and ticket benchmarks
8	NALP Landscape Industry Survey 2024	Landscaping tech wage and job volume benchmarks
9	APSP / Pool & Hot Tub Alliance Benchmarks 2023	Pool tech wage, ticket, and jobs/day data
10	RIA Restoration Industry Association Survey 2023	Restoration tech wage and ticket data ($800 avg)
11	Fiserv / CardConnect payment data	Surcharge passthrough revenue; DSO reduction benchmarks
12	NACHA ACH Payment Statistics 2023	DSO reduction from field payment collection (32 days to same-day)
13	GPS Insight internal telematics data	Fuel card cross-reference savings ($1,800/vehicle/yr); route optimization benchmarks
14	Progressive Commercial / Insureon 2024	15–30% insurance premium reduction with telematics program
15	Nationwide Fleet Telematics Study 2023	Insurance reduction validation and carrier program benchmarks
16	GF Data M&A Report 2024	Home services exit multiples (10.2x average); enterprise value methodology
17	PitchBook Private Equity Comps 2024	PE exit multiple ranges; franchise M&A comparable transactions
18	IFA Franchise Economic Outlook 2024	Network technician counts; FSM adoption rates; franchise workforce benchmarks
19	ServiceBridge customer case studies	Robertson Pools (64% revenue growth); Critter Control (headcount-neutral growth); Master Mastic (2x sales)
20	GPS Insight blog — FSM Comparison 2026 (gpsinsight.com/blog)	ServiceBridge pricing confirmation ($24.95); competitive positioning vs. ServiceTitan and Jobber

Note: Where proprietary GPS Insight / ServiceBridge internal data is cited, figures represent aggregated customer outcomes across the platform's active user base and are available for review upon request. All third-party sources are publicly available as of April 2026.

The table below maps every key capability of The Insight Engine against the closest competitor tools available in the FSM market as of April 2026. No competitor has built a tool designed for the franchisor or PE audience.

Feature / Capability	Insight Engine	ServiceTitan	HousecallPro	Jobber	Others
AUDIENCE & PURPOSE					
Built for franchisors & PE firms — not just individual operators	✓	✗	✗	✗	✗
Models full franchise network — scales across all locations & techs	✓	✗	✗	✗	✗
PE exit multiple & enterprise value output	✓	✗	✗	✗	✗
Capital allocation decision tool — not a sales lead gate	✓	✗	✗	✗	✗
DEPTH OF MODEL					
Number of value levers modeled (sourced)	8 levers	2-3	1-2	None	2-4
Trade-specific wage, ticket & jobs/day benchmarks	✓	✗	✗	✗	✗
Week 1 payback timeline — day by day	✓	~	✗	✗	✗
Side-by-side franchise network comparison (3-way)	✓	✗	✗	✗	✗
GPS fleet telematics integrated into ROI model	✓	✗	✗	✗	✗
CREDIBILITY & AUDITABILITY					
Source citations for every assumption — 29 references	✓	✗	✗	✗	✗
Confidence ratings per assumption (Very High to Medium)	✓	✗	✗	✗	✗
Fully unlocked Excel — no watermarks, no locked cells	✓	✗	✗	✗	✗
Real documented customer outcomes built in	✓	~	~	✗	✗
Separate Sources & Methodology tab with bibliography	✓	✗	✗	✗	✗
PURPOSE & GATEKEEPING					
Requires demo request to see results (lead gen gate)	✗	✓	~	✗	~
Designed to open franchisor / PE board meeting doors	✓	✗	✗	✗	✗
Built for a data room or LP quarterly letter	✓	✗	✗	✗	✗
EBITDA attribution methodology — sourced & auditable	✓	✗	✗	✗	✗

Key: ✓ = Full capability | ✗ = Not available | ~ = Partial / limited. Competitor data sourced from public product pages, pricing pages, and tool reviews as of April 2026. ServiceTitan ROI calculator routes to demo request (lead gen gate). HousecallPro

revenue calculator is single-operator only with no source citations. Jobber has no pre-sale ROI tool. Others (IFS/Gogh, Thorbis, ServiceWorks) are single-operator or dispatcher-focused tools.
